

Vignesh Kumar S

Senior Developer | Mobile & Full Stack

Phone: +91 8344744344

Email: vigneshkumar5776@gmail.com

Address: Tiruppur, Tamil Nadu

LinkedIn: <http://linkedin.com/in/vignesh-kumar-s-886841240>

Professional Summary

Senior Developer with **3.5+ years of experience** specializing in high-performance React Native mobile applications and scalable Python (FastAPI) backend solutions. Proven expertise in translating complex product requirements into reliable, maintainable code while ensuring crash-free sessions for large-scale user bases. Highly adaptable professional actively expanding full-stack capabilities to deliver **end-to-end engineering solutions**.

Core Skills

- **Mobile:** React Native, Redux, WebSockets, Reanimated, Victory Native, iOS/Android Deployment, Deep Linking, Internationalization (i18n)
- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS.
- **Backend:** Python (FastAPI), PostgreSQL, RESTful APIs, Role-Based Access Control (RBAC).
- **Tools:** Android Studio, XCode, Firebase, AWS, Payment Gateways (Razorpay, Stripe), Git, Postman, Jira

Experience at ApplogiQ

Tiruppur, Tamil Nadu | Jun 2022 – Present

Planora – Project Management System | Junior Backend Developer

Nov 2025 - Present

- **Developed core backend modules** for a PMS solution using **FastAPI** and **PostgreSQL**, supporting a user base of **500+ active users**.
- **Implemented role-based permissions** under senior guidance to manage access for 5+ user types, helping to secure the application environment.
- **Contributed to frontend development** by building dynamic boards and live dashboards in **React JS**, which helped reduce task coordination time by **30%**.
- **Assisted in optimizing API performance**, resulting in **35-40% faster response times** during peak traffic hours.

Ayushya AI – Powered Multilingual Medical Assistant | Senior React Native Developer

Jan 2025 - Nov 2025

- Built **Android, iOS, and kiosk applications** with support for **14+ Indian languages**, improving accessibility for diverse communities.
- **Reduced AI response latency by 40%** by implementing real-time communication using **WebSockets**, ensuring high-speed, reliable interactions for critical medical queries.
- Ensured **offline access and secure voice recording** with RNFS for low-connectivity environments.
- Delivered **FastAPI backend services** and **role-based admin panels** (Super Admin, Medical Center, Doctor) using React JS, optimizing clinical workflows and application performance.

QBace – Medical Exam Preparation Platform | React Native Developer

May 2024 - Jan 2025

- Led end-to-end mobile application delivery across iOS and Android, maintaining **99.5% crash-free sessions**.
- Standardized UI behavior using React Native Paper and Reanimated, lowering interface-related issues by **25%**.
- Delivered interactive progress analytics with Victory Native, used by **10K+ learners**.
- Upgraded secure subscription payments using Razorpay and Apple In-App Purchases.
- Designed intelligent test generation logic, improving completion rates by **20%**.

Planit – Tourism & Travel Social Platform | React Native Developer

May 2023 - May 2024

- Refined performance of a cross-platform travel application with **50K+ monthly users**.
- Implemented location-based discovery using interactive maps, increasing nearby attraction engagement by **35%**.
- Integrated real-time event and content feeds, reducing data load delays by **40%**.
- Collaborated with managers, designers and backend engineers to deliver sprint commitments on schedule.

Squads – Cricket Community Engagement Platform | Junior React Native Developer

Jun 2022 - May 2023

- Crafted reusable UI components across **50+ screens** using React Native Paper.
- Presented live match insights and player analytics through Victory Native charts, extending session duration by **25%**.
- Developed venue and club discovery for **100+ locations** using Google Map-based navigation.
- Supported secure payments for memberships and tournaments via Stripe payments.

Soft Skills

- Technical Problem Solving
- Product Requirement Translation
- Team Leadership
- Agile Project Delivery
- Stakeholder Management
- Cross-functional Collaboration
- Adaptability & Rapid Upskilling

Education

Sasurie College of Arts & Science | Jun 2019 – May 2022 B.Sc. Computer Science & Application | CGPA: 7.8/10

Awards & Recognition

Consistently recognized for technical excellence with "Performer of the Year" (2023), "Programmer of the Year" (2024), and "Solution Provider of the Year" (2025) awards at **ApplogiQ** for delivering high-quality mobile applications and exceeding client expectations.

Professional Development & Growth

Backend Engineering: Actively transitioning into backend architecture by applying **Python (FastAPI)** and **PostgreSQL** to production-level project management systems.

Fullstack Proficiency: Deepening expertise in **Next JS** and **React JS** through the development of live, data-driven dashboards for 500+ active users.

Native Mobile Development: Continuing advanced training in **Native Android development** to complement existing **React Native** expertise and provide a more holistic mobile engineering approach.
